

HIGH PRESSURE STAINLESS STEEL

316 SS
Grooved Ends
300 PSI Rating
1"/25mm through
6"/150 mm

Metraflex[®]
for pipes in motion

FIRE PROTECTION DIVISION

The latest addition from the Metraflex Fire Protection Division is the UL Listed, all stainless-steel construction Fireloop and FireVoop expansion joints, as well as the FireStrait flexible pump connector. Designed to handle corrosive coastal environments, these seismic products are constructed with 316 SS grooved end-fittings and are available in just about any size or movement you could want. Our stainless and HP flexible pump connectors can be used alongside fire pumps in demanding high-pressure situations. The design utilizes Metraflex-exclusive high-pressure hose, giving it a **300 psi rating** in sizes 1"/25mm through 6"/150 mm diameter.

**SS Fireloop® Seismic
Expansion Joint**

**SS FireStrait
Flexible Connector**

**SS FireVoop Seismic
Expansion Joint**

Metraflex has been supplying piping specialty products since 1958. With the introduction of the UL listed, FireLoop® seismic expansion joint, Metraflex has brought its expertise in seismic expansion joints to the fire sprinkler industry. The introduction and rapid industry acceptance of the FireLoop® for fire sprinkler systems, plus its compliance with NFPA 13 guidelines, has made it the seismic expansion joint of choice.
